

# ASSET LIFECYCLE

## CRITICAL SPARE DRIVE PREVENTATIVE MAINTENANCE PROGRAM

# Ensure that your critical spare drives are install-ready.

Take advantage of the AIMM Services critical spare drive preventative maintenance program.

## ASK YOURSELF

- Do you have critical spare Variable Frequency Drives (VFDs) that are being stored on your shelf?
- Did you know that if a drive is stored for an extended period of time there are components within the drive that can degrade and lead to failure when power is applied?

## LET US HELP

The AIMM Services critical spare drive preventative maintenance service allows a pre-qualified variable frequency drive to be readied for installation when you need it most.

## BENEFITS

- ✓ Maintain the critical spare drives on your shelf to ensure they are install-ready
- ✓ Comply with manufacturer-recommended specifications for stored drives
- ✓ Decrease unplanned downtime

\* Maintenance schedules may vary. Please refer to your drive manufacturer's maintenance manual.

## WHAT TO EXPECT

We will work with you to build a custom program to maintain your critical spare VFDs. During the planning process we will pre-qualify your drives to ensure they qualify for maintenance. If they do not qualify, we will provide recommendations for handling of those drives.

Our AIMM Services Technician will visit your facility at the predetermined time(s) to perform the drive maintenance. After the service is complete our technician will apply a service sticker to the VFD box that lists the recommended date of next service.

Upon completion of each maintenance visit our AIMM Services Technician will inform you of the status of the serviced drive(s).\*

## NEXT STEP

To receive more information or to sign up for the critical spare drive preventative maintenance program contact your local Industrial Solutions Network location, AIMM Services Representative or visit [\*\*\*aimm-services.com/drive-maintenance\*\*\*](https://aimm-services.com/drive-maintenance).

For more information about AIMM Services and our other service offerings visit [\*\*\*aimm-services.com\*\*\*](https://aimm-services.com).

\*If during the maintenance period the drive capacitor does not reform to manufacturer standards the drive will need replaced. We will advise you of the status of your drive at the end of service.
